Allowable Subject Matter

1. Claims 1-18 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior arts Okumura et al (6,331,844 B1) and Hush et al (6,069,451) fails to teach a driving circuit for a flat panel display comprising a voltage to current converting unit supplying current of a plurality of levels to a data line of the display panel according to logical combinations of the sampled picture signal from the latch unit, using a current mirror method, wherein the voltage to current converting unit includes a plurality of poly-crystalline switching units formed on the display panel as claimed in

Claim 1.

3. The prior arts fail to teach a driving circuit for a flat panel display wherein the voltage to current converting unit comprises: a first switching unit for controlling a flow of a reference current by an enable signal; a second switching unit connected to the first switching unit for controlling the flow of the reference signal by the enable signal; a first NMOS transistor for forming a reference path on which the reference current flows between the first switching unit and ground by being applied the reference current on a gate electrode thereof; a plurality of NMOS transistors not including the first NMOS transistor for forming a plurality of current paths in a parallel direction between the data line and the ground of the display panel according to picture signals having a plurality of bit numbers by being

applied the reference signal on respective gate electrodes thereof; and a plurality of switching units for controlling switching of the plurality of current paths by being applied the picture signal having the plurality of bit numbers independently as claimed in Claim 5 and 18.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
